

FILTER ELEMENT ADAM BY PIUSI FOR FT10XA FILTER FT100A

FT100A

FLUID COMPATIBILITY

Diesel

30 micron replacement element for FT10XA fuel filter. Removes particulate and water from diesel and low-viscosity lubricants.

FEATURES

- 30 micron filtration rating
- Removes particulate and water
- Suits FT10XA filter housing
- Diesel and low-viscosity lubricants
- Field-replaceable element
- Weight 3.23 kg

BENEFITS

- Cleaner fuel reaching engines and equipment
- Protects injectors from particulate damage
- Water removal prevents corrosion and microbial growth
- Quick swap keeps dispensing systems running
- Fits existing FT10XA installations, no housing replacement

TECHNICAL SPECIFICATIONS

Filtration	30 micron particulate and water removal
Weight	3.23 kg
Compatibility	FT10XA filter housing
Fluid Compatibility	diesel and low-viscosity lubricants

Application	workshop dispensing, bulk transfer, site refuelling
Servicing	field-replaceable element keeps downtime short

USE CASE & APPLICATION

- Workshop diesel dispensing
- Site refuelling systems
- Bulk fuel transfer
- Low-viscosity lubricant handling
- Mobile service truck setups
